Dear Sirs,

I am very concerned that as a Monopoly microsoft is allowed to leverage this status in other ventures.

I know ATT was not allowed to invest out side of its on field. So I don't think Microsoft should

be allowed to invest outside the Windows/Office area. Specifically , as a monopoly Microsoft should not be investing in Network Services (msn.net) or ISP servcies (MSN/Quest) or Media (msnbc). Microsoft should divest it's self of these companies.

Thank You.
